

January 6, 2010

To: Bryley clients  
From: Gavin Livingstone, President  
Subject: Bryley Systems complies with Massachusetts privacy statute 201 CMR 17.00

On March 1<sup>st</sup>, Massachusetts will require that all organizations secure and continuously protect the personal information of Massachusetts residents, both physically and technically.

I am pleased to announce that Bryley Systems meets the requirements of 201 CMR 17.00. We estimate that the effort required for Bryley to comply with this statute consumed over 250 hours and required out-of-pocket expenditures of about \$2,500 on materials and security equipment.

Because 201 CMR 17.00 requires the protection of personal information on Massachusetts residents, we believe organizations have greater levels of risk based on their business needs and processes. So, we loosely classify organization risk levels as follows, based on the personal information retained and processed within the organization:

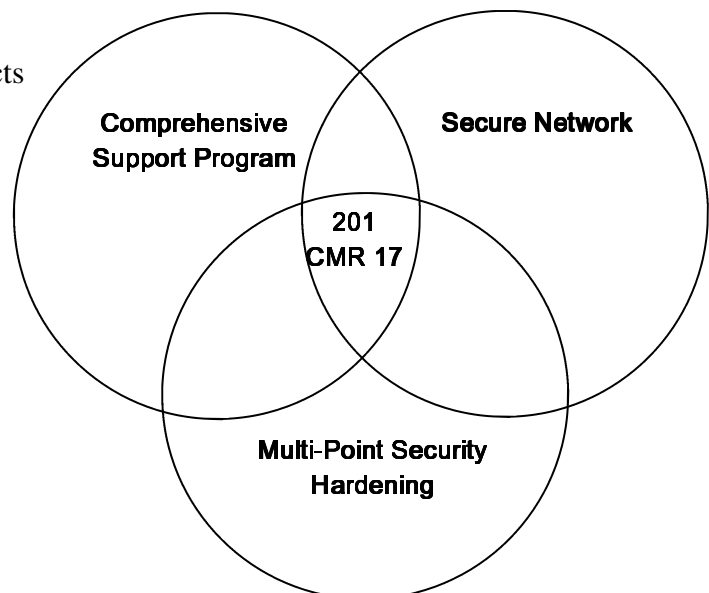

- Low risk – Organizations that retain employee data
- Moderate risk – Organizations that process credit cards
- High risk – Organizations that retain and process financial information

Bryley assists organizations to meet the technical requirements through our three-part program:

- 1.) Comprehensive Support Program (CSP) – An ongoing, managed-technology service that provides continuous updates and scans to CSP-covered equipment, which includes Windows-based workstations and servers, firewalls, and related equipment.
- 2.) Secure Network (SN) – An ongoing, managed-technology service that prevents intrusion, malware, and spam from entering your computer network through its Internet gateway and can restrict web-site surfing to inappropriate sites (gaming, shopping, etc.)
- 3.) Multi-Point Security Hardening Service – A periodic project to harden the security on your computer-network by reviewing/updating policies and configurations.

With these three parts, Bryley can help your organization comply with the technical aspects of the Massachusetts privacy statute 201 CMR 17.00.
